SKILLS

LANGUAGES

- KOTLIN
- JAVA
- JAVASCRIPT

MOBILE DEVELOPMENT

- Android SDK
- React Native

ARCHITECTURE

- MVVM
- Clean Architecture
- REDUX

FRONTEND

- React.js

BACKEND / API

- REST APIs
- Node.js

DATABASE

- SQLite

TOOLS

- GitHub
- Firebase
- Crashlytics
- CI/CD
- Agile

PROFESSIONAL SUMMARY

Senior Mobile Application Developer with **9+ years of experience building scalable and high-performance mobile applications using Android (Kotlin/Java) and React Native**. Experienced in delivering **enterprise-grade mobile solutions for banking, healthcare, and social platforms serving large user bases**. Strong expertise in **REST API integration, MVVM, Clean Architecture, and performance optimization**. Proven ability to **design scalable features, improve application stability, and mentor developers in Agile environments**.

WORK EXPERIENCE

I.T Analyst, 05/2022 – Present
Tata Consultancy Services (TCS), Hyderabad, India

- Develop and optimize mobile banking features using Kotlin and React Native.
- Build scalable modules supporting financial transactions and account management.
- Monitor application stability using Firebase Crashlytics.
- Collaborate with cross-functional teams to deliver secure mobile features.
- Reduced application crash rate by improving error handling and monitoring using Firebase Crashlytics.

Senior Software Engineer, 02/2021 – 05/2022
BirlaSoft, Hyderabad, India

- Developed enterprise mobile apps for healthcare and inventory management.
- Integrated REST APIs for real-time data synchronization.
- Improved performance through UI and API optimization.

Software Engineer, 02/2019 – 01/2021
PruTech Solutions, Hyderabad, India

- Developed cross-platform mobile applications using React Native.
- Implemented secure REST API integrations.
- Improved app stability and performance through debugging and refactoring

Software Engineer, 07/2016 – 01/2019
Credencys Solutions, Ahmedabad, India

- Developed native Android applications using Java.
- Implemented UI components, API integrations, and local database features

PROJECTS

iMobile / iMobile Pay – ICICI Bank
Client: ICICI Bank Ltd.
Domain: Mobile Banking
Technology: Java, Kotlin & React Native
Duration: May 2022 – Present

- Contributed to one of India's leading banking applications used by millions of users.
- Implemented secure financial features including payments and fund transfers.
- Optimized application performance and reduced latency for high-volume financial transactions.

Event Inventory Management System - Stryker
Client: Stryker Corporation
Domain: Medical Devices/ Health Supply Chain
Technology: Java, React Native
Duration: Feb 2021 – May 2022

- Built mobile solution for tracking surgical device inventory.
- Enabled real-time inventory allocation and reconciliation.

Petbubs – Social Platform for Pets
Client: Petbubs
Domain: Mobile App/Social Networking
Technology: JAVA
Duration: Feb 2019 – May 2021

- Developed Android application for pet owner community networking.
- Implemented media sharing, notifications, and reminders.

ROLES & RESPONSIBILITIES

• Design and develop scalable mobile applications using Android (Kotlin/Java) and React Native, ensuring high performance and maintainability.
• Lead end-to-end feature development, from requirement analysis and design to development, testing, and deployment.
• Collaborate with product managers, UI/UX designers, and backend engineers to translate business requirements into robust technical solutions.
• Implement modern mobile architecture patterns such as MVVM and Clean Architecture to ensure modular and maintainable codebases.
• Optimize application performance, memory usage, and battery efficiency to deliver a seamless user experience.
• Monitor application crashes and performance metrics using Firebase Crashlytics, identifying and resolving production issues proactively.
• Conduct code reviews and mentor junior developers, ensuring adherence to coding standards and best practices.
• Participate in Agile ceremonies including sprint planning, estimations, and retrospectives, contributing to technical architecture decisions.
• Integrate RESTful APIs and third-party SDKs to enable secure and efficient mobile functionality.
• Continuously improve application stability, scalability, and release quality through debugging, refactoring, and performance monitoring.

EDUCATION

B.Tech., Electronics Communication Engineering, 04/2016
Bonam Venkata Chalamayya Engineering College - Amalapuram

AWARDS & ACHIEVEMENTS

Hackathon Winner - Built a mobile prototype using Android / React Native that improved user experience and performance, winning among multiple competing teams.

CERTIFICATIONS

- Android App Development Certification – Udemy
- React Native – Mobile App Development – Udemy
